Ph. D. Biochemistry

Grade(s) taught at Trinity: Life Science 7th

Number of years at Trinity: August 2006 (1st year)

What do you want your students to learn from you?

“I would like the students to learn how to think about a question, develop a plan to study that question, collect their data and analyze the data to find an answer to the question; More simply, to learn to see God by studying the depth of his creation.”
